Contents

Foreword xix
Preface xxi

1 Basic Terminology 1

1 Agile Development Processes 5
  1.1 Software Development Methods 5
  1.2 Agile Methods 6
  1.3 Extreme Programming 8
  1.4 Summary of Key Concepts 11
  1.5 Selected Solutions 12
  1.6 Review Questions 12

2 Reliability and Testing 13
  2.1 Reliable Software 13
  2.2 Testing Terminology 15
  2.3 Automated Testing 18
  2.4 JUnit: An Automated Test Tool 19
  2.5 Summary of Key Concepts 24
  2.6 Selected Solutions 25
  2.7 Review Questions 25
  2.8 Further Exercises 26
# 6 Build Management

6.1 New Requirements ............................................. 81
6.2 Build Management Concepts ................................. 82
6.3 Creating the Build Description .............................. 83
6.4 Additional Ant Tasks ............................................ 98
6.5 Analysis ........................................................... 99
6.6 Summary of Key Concepts ................................... 100
6.7 Selected Solutions .............................................. 101
6.8 Review Questions .............................................. 102
6.9 Further Exercises ............................................. 102

# 3 The First Design Pattern

# 7 Deriving Strategy Pattern

7.1 New Requirements ............................................. 109
7.2 One Problem – Many Designs ............................... 110
7.3 Source Tree Copy Proposal ................................. 111
7.4 Parametric Proposal .......................................... 113
7.5 Polymorphic Proposal ......................................... 117
7.6 Compositional Proposal ...................................... 121
7.7 The Compositional Process ................................. 126
7.8 The Strategy Pattern .......................................... 126
7.9 Summary of Key Concepts .................................. 127
7.10 Selected Solutions ........................................... 128
7.11 Review Questions ............................................ 128
7.12 Further Exercises ............................................ 128

# 8 Refactoring and Integration Testing

8.1 Developing the Compositional Proposal ................. 131
8.2 Summary of Key Concepts .................................. 145
8.3 Selected Solutions ........................................... 146
8.4 Review Questions ............................................ 146
8.5 Further Exercises ............................................ 146

Copyrighted Material
## 9 Design Patterns – Part I

- **9.1 The History of Design Patterns**
- **9.2 The Purpose of Patterns**
- **9.3 Patterns as a Communication Device**
- **9.4 The Pattern Template**
- **9.5 Summary of Key Concepts**
- **9.6 Review Questions**
- **9.7 Further Exercises**

## 10 Coupling and Cohesion

- **10.1 Maintainable Code**
- **10.2 Coupling**
- **10.3 Cohesion**
- **10.4 Law of Demeter**
- **10.5 Summary of Key Concepts**
- **10.6 Selected Solutions**
- **10.7 Review Questions**
- **10.8 Further Exercises**

## 4 Variability Management and 3-1-2

### 11 Deriving State Pattern

- **11.1 New Requirements**
- **11.2 One Problem – Many Designs**
- **11.3 TDD of Alternating Rates**
- **11.4 Polymorphic Proposal**
- **11.5 Compositional + Parametric Proposal**
- **11.6 Compositional Proposal**
- **11.7 Development by TDD**
- **11.8 Analysis**
- **11.9 The State Pattern**
- **11.10 State Machines**
- **11.11 Summary of Key Concepts**
- **11.12 Selected Solutions**
- **11.13 Review Questions**
- **11.14 Further Exercises**
